READYMADE WALLS

Are designed for ready-to-install application in building construction. The wall panels have a tongue and groove joining system that facilitates rapid construction with minimum effort and maximizes space utilization. Panels are made of two Fibre-Reinforced Cement facing sheets, on either sides of a lightweight concrete core. The core is made from a mix of Portland cement, binders and, a mix of siliceous and micaceous material aggregate. It's installation works efficiently and offer Speed, Safety, Strength, Sustainability and, extremely compatible with texture coating, painting, wallpaper and veneers.

ATTRIBUTES

EASY TO INSTALL, SAVES TIME, COMPOSITE STRENGTH, ECONOMICAL

- 4 times faster than brickwork
- one forth the weight of brickwork
- robustness and strong
- fire rating more than 2 hours

Termite Resistant

Water Resistant
